

Overall Features

Description - The indoor and outdoor CarCapsule and BikeCapsule are a “bubble” that completely seals and protects your vehicle or motorcycle from dings, dirt, dust, corrosion, mildew, musty odors, rust, and rodents.

How it Works - The heart of the CarCapsule and BikeCapsule is a high-pressure fan providing continuous airflow keeping your vehicle or motorcycle dry and preventing condensation. With the Evaporative Storage System, the air inside the bubble changes 3 to 6 times every hour keeping the temperature inside consistent with the temperature outside and eliminating any moisture to condense on your vehicle or motorcycle. You can finally have peace of mind knowing that your investment is well protected.

Setup - The CarCapsule and BikeCapsule are easy to use! Layout the bubble on the floor, unzip the top section and fold back, drive your vehicle or motorcycle on to the black basemat, install the fan, place the top cover over your vehicle or motorcycle, zip it closed, and then plug the fan in. It takes about 7-10 minutes for the bubble to inflate.

Warranty - One year warranty in workmanship and materials
